## Extension to deadline for returning Research Degree Completion manual corrections

Following discussion with several TEIs we have extended the 20 August deadline for Research Degree Completion manual corrections to 27 August 2010. Thank you to those institutions who have already returned this information.

As previously advised we will use your manually updated RDC data to carry out 2009 funding wash-ups and to confirm 2010 indicative funding allocations. We're planning to complete these funding processes by early October.

The manually corrected RDC information will also provide the basis for the PBRF Annual Report.
