About the University sector

In 2016 the TEC allocated Student Achievement component funding to all eight universities, which funded a range of approximately 2,400 to 29,000 equivalent full-time students.

The nature of enrolments at a specific university will influence its performance. For example, part-time and extra-mural students often have work or family commitments and cannot devote as much time and energy to their studies. They may also have different study goals. For example, Massey University has a large extra-mural roll.

Government expectations of the University sector

The government expects universities to:

- Enable a wide range of students to successfully complete degree and postgraduate qualifications.
- Undertake internationally recognised research. Create and share new knowledge that contributes to New Zealand's economic and social development and environmental management.
- Universities are expected to do more than teaching and learning; they also have an important research role. However, the performance information presented here does not include information about research.
