

Tahatū Career Navigator Information for TEO provider-based provision

Qualifications and courses are important in careers planning because they enhance skills, increase earning potential and provide a clear roadmap for career growth in a constantly evolving job market. Tahatū Career Navigator helps people find the qualifications they need for any career idea, and the best study and training pathways to get there.

Tahatū is built on a model of connection, showing links and pathways between study, training and work.

This infosheet is specifically for **provider-based provision** (referred to as **study** in Tahatū Career Navigator).

We have prepared a separate infosheet for **work-based provision** (referred to as **training** in Tahatū Career Navigator).

Where our data comes from

3 core sets of data

Tahatū is built around 3 core sets of data. These are:

- School subjects – using NCEA achievement standards data from the New Zealand Qualifications Authority (NZQA).
- Career ideas – using data about jobs and pay from Statistics New Zealand's population Census data, Statistics New Zealand's Integrated Data Infrastructure (IDI) database and Inland Revenue data.
- Qualifications and courses – using information TEOs provide to TEC.

For more information about where our data comes from, visit <https://tahatu.govt.nz/our-data>

The data sets connect with each other

Tahatū connects these 3 sets of data to show clear pathways between school, qualifications and the world of work. It shows people how they can get to where they want to be, step by step.

People can see what subjects others took at school before they started a particular qualification and find out what qualifications they need for a particular career idea in just one click.

- School to tertiary: Connecting NCEA attainment and subjects to qualifications and courses.
- Work to tertiary: Connecting career ideas to qualifications and courses.
- Tertiary to tertiary: Connecting different levels of qualifications and courses.

How qualifications are displayed

Qualifications are displayed in clusters

We've grouped qualifications into related study and training options, which we often refer to as 'clusters'. This means courses with the same qualification type and NZSCED subject area are displayed on the same page.

Cluster pages have been designed to provide summary information to learners about a particular level and field of study or training. This combines information from different providers that offer similar and/or the same course on one page to make it easier for learners to evaluate and make a career decision without feeling overwhelmed.

People can see what options are available in New Zealand in one centralised place, and how the different courses and careers link together.

Where to find qualification clusters

Qualification clusters are found in the [Study and training](#) section. You can also find them by searching, browsing or clicking off to related pages.

There are **3 layers** of information within the Study and training section. We have used the example of Bachelor's degrees in Nursing cluster to show the 3 layers of information.

Example: Bachelor's degrees in Nursing

Layer 1 displays the study and training categories on the [Explore study and training](#) page.

Layer 2 displays the related study areas within a selected study and training category.

The example below shows the study areas under the selected 'Health' study and training category.

**Engineering**
Pūhanga

**Health**
Hauora

Health Hauora

✕ Close

Health is the study of maintaining and restoring the physical and mental wellbeing of humans and other animals.

Complementary therapies

Dental

Medical studies

Nursing and midwifery

Optical science studies

Pharmacy studies

Public health studies

Radiography

Rehabilitation therapies

Veterinary

Other health studies

**Hospitality and personal services**
Manaakitanga me ngā ratonga whaiaro

**Information technology**
Hangarau mōhiōhio

Layer 3 displays the qualification clusters associated with that subject area. They can be found by clicking on a subject area when browsing, or by using the search function.

Note: Tahatū will only display a qualification cluster for a subject area if a provider currently offers a course in it.

Nursing and midwifery

Tapuhitanga me te whakawhānautanga

Nursing and midwifery is the study of how to provide health care for the sick, disabled or infirm, and expectant mothers and babies, and how to assist doctors to diagnose and treat patients.

Show more

You might learn about

- monitoring a patient's condition and reporting changes
- communicating well with patients and families
- how to educate people about health care
- how to administer medications and treatments
- hygiene and nutrition

Your focus could be

Tō tino arotahi

Health care assistance
Āwhinatanga atawhai hauora

Midwifery
Kaiwhakawhānautanga

Nursing
Tapuhitanga

How study clusters are displayed

Example: Bachelor's degrees in Nursing

See below screenshots showing the information displayed in study cluster pages.

Study cluster pages: Who can you study or train with

We have used the **Bachelor's degrees in Nursing** cluster as an example to show some key pieces of information shown in the cluster as below.

Bachelor's degrees in Nursing

Ngā tohu Paetahi mō te Tapuhitanga

Examples

Bachelor of Nursing, Bachelor of Health Science (Nursing), Bachelor of Nursing Pacific, Bachelor of Nursing Māori

Level 7-8 qualifications

Within each cluster, you'll see some named examples. These are some of the names of the qualifications offered by providers in a cluster. Only a selection of qualification names are used as examples so learners are not overwhelmed. The selection of names are based on how many students have previously studied that qualification.

Key study information

On the summary page for study, 3 key pieces of information are displayed:

| | | |
|---|---|--|
| <h3>How long it takes</h3>  <h4>Study for 3 years</h4> <p>Check with education providers about studying part time or online.</p> | <h3>What it costs</h3>  <h4>\$22K-\$23K total fees</h4> <p>Paying for study and training</p> | <h3>What you need</h3>  <h4>University Entrance or advanced certificate or diploma</h4> |

What's this study or training like?

This section includes information about study level, credits and links to helpful guides. See screenshots below, again using the Bachelor's degrees in Nursing study cluster as an example.

What's this study or training like?

These courses develop your ability to be registered to practise as a nurse so you can care for people who are sick or disabled and educate people about health.

Study level

1 2 3 4 5 6 **7 8** 9 10

Bachelor's and Honours degrees are Levels 7-8. You can study Levels 1-3 for NCEA at secondary school. A higher level means the study or training is more advanced.

[About qualification levels](#)

Credits

360

You need this many credits to earn a bachelor's or honours degree. One credit equals about 10 hours of mahi like learning, studying and doing assessments. A year's full-time tertiary study is usually worth 120 credits.

Doing study or training Te mahi ako, te mahi whakangungu rānei

Find out ways to do study or training.

Getting qualifications Te whiwhi tohu

Find out about different qualifications and how to get them.

How can you get into this study or training

Below is an example of information you'll see about what you need to do before pursuing Bachelor's degrees in Nursing.

How can you get into this study or training?

You can find a path towards study or training whether you're in or out of school. Figure out what entry requirements you need before you apply.

If you're in school

- Level 1 to 3 NCEA
- University Entrance (UE) or similar

If you're out of school

- Level 4 certificate or foundation or bridging qualification

Other entry options

- Entry options based on age, previous study or work experience

Apply

Check the education provider's website for specific entry requirements and apply

[If you're in school](#)

[If you're out of school](#)

[Other entry options](#)

[Apply](#)

Choose subjects for NCEA

NCEA is the qualification most students study for at secondary school in Aotearoa.

Most common subjects

- English
- Health
- Biology

The subjects you choose for NCEA will help you get ready for future study or training.

If you're not sure which subjects to choose talk to your teacher or school career adviser.

[Choosing NCEA subjects](#)

Get University Entrance (UE) or similar

If you're still in school, you need to get University Entrance (UE), Cambridge International or International Baccalaureate to do a bachelor's or honours degree.

Talk to your teacher or school career adviser about the requirements and what NCEA credits you need to meet them.

[Choosing NCEA subjects](#)

If NCEA is a prerequisite, Tahatū will display the most common subjects other people took before going on to further study towards the qualification, which can help learners plan their secondary school study subjects.

Under the 'Apply' tab, learners are encouraged to check the education provider's website for specific entry requirements.

How can you pay for your study or training?

This information includes a link to an advice page on [Finding and applying for scholarships](#) and [Paying for study and training](#).

There are also links to government study/funding support information, such as the [Fees Free | Study or train fees-free](#) website and the [StudyLink](#) website.

How can you pay for your study or training?
